"What class should I take?"

- **Fanuc Level 1** Intended Audience - no experience or minimal experience with Fanuc robots.
- **Fanuc Level 2,** Intended Audience; (1-5 years) experience, experience cycling, jogging, point touchup, homing robots and preparing systems to run auto.
- **Fanuc Level 3, Advanced Electrical Troubleshooting course,** Intended Audience - experienced robot users that work with the robot regularly programming and troubleshooting. This advanced course covers the following controller types - Fanuc RJ3 through R30Ia, and R30ib controllers. *We strongly recommended students attend Valentine Automation Level 1 & 2 courses prior to attending this advanced Level 3 course.*
- **Fanuc Level 4, Advanced Teach Pendant Programming,** Intended Audience- for high level people with years of experience. This course covers advanced instructions, software tools, and system setup, advanced utilities and covers reloading images and robot mastering, and recovery upon student request.
- **Level 5** , We also offer custom robot Arc Welding, Resistance welding and 2D vision onsite training capabilities by request.

What's included- Each student will receive:
- Printed manuals developed by Valentine Automation, these include: Objectives for each chapter, Terminology, Theory, Procedures and in- depth hands-on lab activities.
- Pre-test, Post-test, Skills certification, students will receive certificates for those completing the class. Copies of above pre/post test scores, sign in sheets, certificates and course evaluations will be forwarded via email to the requestor.

The following Covid-19 precautions will be followed:

- We ask that anyone showing signs of sickness immediately get a Covid test, and if they are sick prior to attending class, we can re-schedule the student for an alternate class.
- Anyone already at class showing symptoms will be required to wear a mask to protect other students.
- If masks are needed, we have plenty available.
- Please contact us if you have any questions regarding Covid issues.
